

1.

The name of the great maestro of Indian Music "Ustad Bismillah Khan" is related to which instrument?

(A)

Shehnai

(B)

Flute

(C)

Tabla

(D)

Sarod

**Answer: "Shehnai"**

2.

Which state is the host of the 26th National Youth Festival?

(A)

Kerala

(B)

Karnataka

(C)

Bihar

(D)

West Bengal

**Answer: "Karnataka"**

3.

How many national Level multistate cooperative export societies have been approved by the Union Cabinet?

(A)

Two

(B)

Three

(C)

Five

(D)

Seven

**Answer: "Three"**

4.

Which of the following pollutant is the most harmful?

(A)

NO<sub>2</sub>

(B)

CO<sub>2</sub>

(C)

SO<sub>2</sub>

(D)

CO

**Answer: "SO<sub>2</sub>"**

5.

For how many days did Mahatma Gandhi's volunteers of the Salt satyagraha walk?

(A)

24

(B)

36

(C)

12

(D)

6

**Answer: "24"**

6.

Which of the following is called as the leader of Lok Sabha?

(A)

Speaker

(B)

President

(C)

Prime Minister

(D)

Deputy Speaker

**Answer: "Prime Minister"**

7.

Which of the following is the correct coastal length of India including the islands?

(A)

5000 km

(B)

5631 km

(C)

7517 km

(D)

8216 km

**Answer: "7517 km"**

8.

Which of the following passes is situated at the highest elevation?

(A)

Nathu La

(B)

Jelep La

(C)

Rohtang

(D)

Zoji La

**Answer: "Nathu La"**

9.

Which planet disappeared from sight on September 14, due to a phenomenon called 'Lunar occultation'?

(A)

Mercury

(B)

Venus

(C)

Uranus

(D)

Saturn

**Answer: "Uranus"**

10.

Which major tech company announced to change its policy to comply with the Competition Commission of India (CCI)'s directives?

(A)

Meta

(B)

Microsoft

(C)

Google

(D)

Amazon

**Answer: "Google"**

11.

Velocity of sound in air does not depend on\_\_:

(A)

Density of air

(B)

Temperature of air

(C)

Pressure of air

(D)

Humidity of air

**Answer: "Pressure of air"**

12.

If cream is removed from milk, its density\_\_:

(A)

Increases

(B)

Decreases

(C)

Remains the same

(D)

May increase or decrease

**Answer: "Increases"**

13.

The wall of a dam is made thicker at the bottom than at the top because the pressure exerted by the water on the wall\_\_:

(A)

depends on the thickness of the wall

(B)

increases with height of the wall

(C)

increases with depth of the wall

(D)

depends on the area of the wall

**Answer: "increases with depth of the wall"**

14.

The property of catenation is predominant in:

(A)

sulphur

(B)

nitrogen

(C)

silicon

(D)

carbon

**Answer: "carbon"**

15.

Bauxite is an alloy of which of the following metals?

(A)

Aluminium

(B)

Silver

(C)

Tin

(D)

Iron

**Answer: "Aluminium"**

16.

Interveinal necrotic spots on leaves appear due to:

(A)

HF injury

(B)

SO<sub>2</sub> injury

(C)

NO<sub>2</sub> injury

(D)

O<sub>3</sub> injury

**Answer: "SO<sub>2</sub> injury"**

17.

Which of the following is secreted by the liver?

(A)

Gastric juice

(B)

Saliva

(C)

Pancreatic juice

(D)

Bile juice

**Answer: "Bile juice"**

18

The impure blood from the right ventricle goes into -

(A)

liver

(B)

lungs

(C)

heart

(D)

brain

**Answer: "lungs"**

19.

Which of the following vitamin is water-soluble?

(A)

Vitamin C

(B)

Vitamin A

(C)

Vitamin D

(D)

Vitamin K

**Answer: "Vitamin C"**

20.

Which part of the alimentary canal receives the bile from the liver?

(A)

Small intestine

(B)

Large intestine

(C)

Stomach

(D)

liver

**Answer: "Small intestine"**

21.

The main goal of treatment for acute glomerulonephritis is to:

(A)

encourage activity.

(B)

encourage high protein intake.

(C)

maintain fluid balance.

(D)

teach intermittent urinary catheterization.

**Answer: "maintain fluid balance"**

22.

The most common, preventable complication of abdominal surgery is:

(A)

Atelectasis

(B)

fluid and electrolyte imbalance.

(C)

Thrombophlebitis

(D)

urinary retention.

**Answer: "Atelectasis"**

23.

To prepare a patient on the unit for a bronchoscopic procedure, the medical-surgical nurse administers the IV sedative. The nurse then instructs the licensed practical/vocational nurse to:

(A)

educate the patient about the pending procedure.

(B)

give the patient small sips of water only.

(C)

measure the patient's blood pressure and pulse readings.

(D)

take the patient to the bathroom one more time.

**Answer: "measure the patient's blood pressure and pulse readings"**

24.

Which action best describes a sentinel event alert?

(A)

Documenting the breakdown in communication during a shift report.

(B)

Indicating that a community or institution is unsafe.

(C)

Recording the harm done when a medication error occurs.

(D)

Signalling the need for immediate investigation and response.

**Answer: “Signalling the need for immediate investigation and response”**

25.

A nursing department in an acute care setting decides to redesign its nursing practice based on a theoretical framework. The feedback from patients, families, and staff reflects that caring is a key element. Which theorist best supports this concept?

(A)

Erikson

(B)

Maslow

(C)

Rogers

(D)

Watson

**Answer: “Watson”**

26.

The first step in applying the quality improvement process to an activity in a clinical setting is to:

(A)

assemble a team to review and revise the activity.

(B)

collect data to measure the status of the activity.

(C)

select an activity for improvement.

(D)

set a measurable standard for the activity.

**Answer: “select an activity for improvement”**

27.

Asthma is a chronic disorder that causes

(A)

Pneumonia

(B)

skin rashes

(C)

heart blockage

(D)

inflammation in the airway

**Answer: "inflammation in the airway"**

28.

While performing physical examination of the newborn testis could not be palpated in the scrotum. The failure of the testis to descend normally through the inguinal canal is called as

(A)

Chordee

(B)

Epispadias

(C)

Hypospadias

(D)

Cryptorchidism

**Answer: "Cryptorchidism"**

29.

Glasgow coma scale (GCS) is a measure of –

(A)

Neurological assessment

(B)

Level of consciousness (LOC)

(C)

Fluid volume

(D)

Intra cranial pressure (ICP)

**Answer: "Level of consciousness (LOC)"**

30.

Which are the following medications would the nurse anticipate the physician would order to increase the blood pressure for a patient with septic shock-

(A)

Atropine

(B)

Dopamine

(C)

Digoxin

(D)

Nitro-glycerine

**Answer: "Dopamine"**

31.

The Non-modifiable risk factors for hypertension include all except:

(A)

Age

(B)

Genetic factors

(C)

Obesity

(D)

Sex

**Answer: "Obesity"**

32.

The benign tumour of blood vessel is called-

(A)

Haemangioma

(B)

Myoma

(C)

Lipoma

(D)

Adenoma

**Answer: "Haemangioma"**

33.

Which is not an example of S.T.D

(A)

Hepatitis-A

(B)

Syphilis

- (C)  
AIDS
- (D)  
Gono

**Answer: "Hepatitis-A"**

34.

The test that is most specific for myocardial damage is-

- (A)  
CK MB
- (B)  
Myoglobin
- (C)  
Troponin -I
- (D)  
CK

**Answer: "CK MB"**

35.

Which one of the following actions would a nurse take first when caring for a patient experiencing a cardiac arrest-

- (A)  
Initiate cardiac monitoring
- (B)  
Provide intravenous access
- (C)  
Establish an open airway
- (D)  
Obtain a pulse oximetry reading

**Answer: "Establish an open airway"**

36.

Which of the following are produced by microorganisms?

- (A)  
Alcoholic beverages
- (B)  
Fermented dairy products

(C)

Breads

(D)

All of the mentioned

**Answer: "All of the mentioned"**

37.

The principal microorganism for yogurt is \_\_\_\_\_

(A)

Leuconostoc citrovorum

(B)

Streptococcus lactis

(C)

Streptococcus thermophilus

(D)

Lactobacillus acidophilus

**Answer: "Streptococcus thermophilus"**

38.

Cardiac tamponade means

(A)

Inflammation of myocardium

(B)

Inflammation of epicardium

(C)

Accumulation of fluid in pericardium

(D)

Ventricular failure

**Answer: "Accumulation of fluid in pericardium"**

39.

Paget's disease is a

(A)

Cardiac disease

(B)

Respiratory disease

(C)

Bone disease

(D)

Urinary disease

**Answer: "Bone disease"**

40.

What applies to a victim with a reduced consciousness?

(A)

The victim is still capable to speak

(B)

The victim is in shock

(C)

The victim does not react to speaking and shaking

(D)

The victim is still alert

**Answer: "The victim is still capable to speak"**

41.

The most characteristic manifestation of hypocalcaemia and hypomagnesaemia

(A)

anorexia and nausea

(B)

Constipation

(C)

Lack of coordination

(D)

Tetany

**Answer: "Tetany"**

42.

Altruism means

(A)

Right to self determination

(B)

Respect for individual and population

(C)

Concern for the welfare and well-being of others

(D)

Respect the patient's rights

**Answer: "Concern for the welfare and well-being of others"**

43.

Implants used for orthopaedic surgeries generated to be discarded in

(A)

Yellow bin

(B)

Blue bin

(C)

White bin

(D)

Red bin

**Answer: "Blue bin"**

44.

A patient reports abdominal pain that is difficult to localize. The nurse documents this as which type of pain?

(A)

Visceral pain

(B)

superficial pain

(C)

phantom pain

(D)

Referred pain

**Answer: "Visceral pain"**

45.

Which one of the following is not the components of braden scale?

(A)

Sensory perception

(B)

Shear

(C)

Mobility

(D)

Length of hospital stay

**Answer: "Length of hospital stay"**

46.

Antibodies are produced by the body in response to an antigen is referred as

(A)

Passive immunity

(B)

Active immunity

(C)

Acquired immunity

(D)

Innate immunity

**Answer: "Active immunity"**

47.

When an ethical issue arises, one of the most important nursing responsibilities in managing client care situations is which of the following?

(A)

Be able to defend the morality of one's own actions

(B)

Remain neutral and detached when making ethical decision

(C)

Ensure that a team is responsible for deciding ethical questions.

(D)

Follow the client and families' wishes exactly

**Answer: "Be able to defend the morality of one's own actions"**

48.

The nurse plans to remove the client's sutures which action demonstrates not appropriate standard of care?

(A)

Use clean technique

(B)

Grasp the suture at the knot with a pair of forceps

(C)

Place the curved tip of the suture scissors under the suture as close to the skin as possible

(D)

Remove alternate sutures first

**Answer: "Use clean technique"**

49.

The specific accountability or liability associated with the performance of duties of a particular role is known as,

(A)

Veracity

(B)

Beneficence

(C)

Responsibility

(D)

Justice

**Answer: "Responsibility"**

50.

Which one of the following is not segregated in red category?

(A)

Syringes with fixed needles

(B)

Intravenous tubes and sets

(C)

Rubber apron

(D)

Catheters

**Answer: "Syringes with fixed needles"**

51.

Which of the following solution is used for oral care for the prevention of ventilator-associated pneumonia?

(A)

Methyl salicylate

(B)

Menthol solution

(C)

Chlorhexidine

(D)

Normal saline

**Answer: "Chlorhexidine"**

52.

Which of the following is the drug of choice for Diabetes Insipidus?

(A)

Desmopressin

(B)

Dopamine

(C)

Osmotic Diuretics

(D)

Nor adrenaline

**Answer: "Desmopressin"**

53.

While health education on anticoagulation therapy for the patient with valve replacement surgery with a mechanical valve, which of the following statement by a nurse about the therapeutic level of the drug is right?

(A)

Maintain an International Normalized ratio of 1

(B)

Maintain International Normalized ration of 1.5-2.5

(C)

Maintain International Normalized ratio of 2.5-3.5

(D)

Maintain International Normalized ratio less than 1

**Answer: "Maintain International Normalized ratio of 2.5-3.5"**

54.

Which of the following fibrinolytic drug is administered for the patient with ischemic stroke?

(A)

Streptokinase

(B)

Heparin

(C)

Urokinase

(D)

Tissue plasminogen activator

**Answer: "Tissue plasminogen activator"**

55.

Any stimulus that follows a behaviour and increases the likelihood that the behaviour will be repeated is called a:

(A)

Cue

(B)

Punisher

(C)

Reinforcer

(D)

Situational stimulus

**Answer: "Reinforcer"**

56.

The term used for a child's one-word utterances is –

(A)

Holophrases

(B)

Telegraphic speech

(C)

Under extensions

(D)

None of these mentioned

**Answer: "Holophrases"**

57.

The priority nursing intervention for the patient with an altered level of consciousness is

(A)

Prevention of bed sore

(B)

Administration of enteral feeding

(C)

Maintain patent airway

(D)

Provide IV Access

**Answer: "Maintain patent airway"**

58.

To keep the spinal column straight which of the following technique nurse must adopt to transfer the patient

(A)

Using stretcher technique

(B)

Log rolling

(C)

Make the patient to sit then shift

(D)

Ask the patient to turn to side then move

**Answer: "Log rolling"**

59.

The first dose of post-exposure prophylaxis is to be administered within how many hours for a person with a needle stick injury from an HIV patient?

(A)

within 24 hours

(B)

within 12 hours

(C)

within 48 hours

(D)

within 72 hours

**Answer: "within 72 hours"**

60.

The amount of light entering the eye is determined by the size of the

(A)

Retina

(B)

Cornea

(C)

Pupil

(D)

Diaphragm

**Answer: "Pupil"**

61.

Prolactin hormone is responsible for –

(A)

Breast milk

(B)

Height

(C)

Vision

(D)

Nutrition

**Answer: "Breast milk"**

62.

Which gland is known as supra renal gland –

(A)

Pituitary

(B)

Thyroid

(C)

Adrenal

(D)

Pineal

**Answer: "Adrenal"**

63.

Islets of Langerhans is part of –

(A)

Pancreas

(B)

Stomach

(C)  
Liver

(D)  
Thyroid

**Answer: "Pancreas"**

64.

Which of the following can be a suitable area of study in the scope of sociology?

(A)  
Trade

(B)  
community

(C)  
Education

(D)  
Individual

**Answer: "community"**

65.

The eight-stage classification of human life is proposed by

(A)  
Sigmund Freud

(B)  
Pavel

(C)  
Strauss

(D)  
Erikson

**Answer: "Erikson"**

66.

A client tells the nurse that his co-workers are sabotaging the computer. When the nurse asks questions, the client becomes argumentative. What is the most appropriate intervention for the nurse to implement?

(A)  
Encourage the client to vent his anger about his computer

(B)

Tell the client that his co-workers haven't touched his computer

(C)

Use clear and consistent speech when talking to the client

(D)

Tell the client to go to his room and stay there until he calms down

**Answer: "Use clear and consistent speech when talking to the client"**

67.

A client with paranoid personality disorder is discussing current problems with a nurse. What is the most important intervention for the nurse to implement?

(A)

Have the client look at sources of frustration

(B)

Have the client focus on ways to interact with others

(C)

Have the client discuss the use of defence mechanisms

(D)

Have the client clarify thoughts and belief about an event

**Answer: "Have the client clarify thoughts and belief about an event"**

68.

Which of the following nursing diagnoses would be appropriate for a client with an avoidant personality disorder?

(A)

Risk for self-mutilation related to a desperate need for attention

(B)

Ineffective coping related to negative attitudes toward health behaviour

(C)

Anxiety related to fear of criticism, disapproval, and rejection

(D)

Risk for injury related to uncontrolled anger and hostility toward others.

**Answer: "Anxiety related to fear of criticism, disapproval, and rejection"**

69.

Which of the following is INCORRECT regarding diagnosis under RNTCP?

(A)

Cough for 2 weeks' suspect T(B)

(B)

Only 2 samples of sputum are needed

(C)

Chest X ray is essential

(D)

Only one positive sample is enough for diagnosis

**Answer: "Chest X ray is essential"**

70.

Master Rohan has been brought to Sub centre at 11 months' age for immunization. He has received BCG, Hep B-1, Pentavalent 1 and OPV-1 at 5 months of age. Which is most appropriate vaccine you can administer to him?

(A)

Start from beginning as vaccine should be given at a 4-week interval.

(B)

Administered Hep B-2, Pentavalent 2 , OPV-2 and Measles

(C)

Administered Hep B-2, Pentavalent 2 , OPV-2

(D)

Refer to PHC for seeking medical officer advice.

**Answer: "Administered Hep B-2, Pentavalent 2 , OPV-2 and Measles"**

71.

Which of the following statement is NOT CORRECT regarding DPT vaccine?

(A)

A child who is allergic to DPT and develop encephalopathy should be replace with DT/DTaP.

(B)

If child has never received DPT, DPT vaccine can be given up to age of 9 year

(C)

the gap between two doses of DPT must be 4 weeks to achieve optimum antibody level.

(D)

DPT is replaced by DT for children above 2 years.

**Answer: "A child who is allergic to DPT and develop encephalopathy should be replace with DT/DTaP"**

72.

What is measles Catch up Campaign?

(A)

A special campaign to vaccinate all children in wide range of age group in a state.

(B)

A special campaign to vaccinate all drop out child

(C)

A special campaign to vaccinate all immunized child with booster dose.

(D)

A special camp for early identification and treatment of measles.

**Answer: "A special campaign to vaccinate all immunized child with booster dose"**

73.

Baby Yoshika is 3-month-old and has been brought to you by parents complaining of no scar formation on BCG site. What will be your most appropriate answer to the parents?

(A)

Wait till one year if scar does not develop repeat the dose.

(B)

Vaccine is not administered properly so; baby need to administered BCG immediately.

(C)

There is no need to re vaccinate the child

(D)

Refer to Physician as child might has TB

**Answer: "There is no need to re vaccinate the child"**

74.

Which of the following service is NOT available in Upgraded PHC?

(A)

Child health and Nutrition

(B)

Treatment for vector borne disease

(C)

Treatment for Hearing Impairment

(D)

Chest infection

**Answer: "Treatment for Hearing Impairment"**

75.

Which of the following is INCORRECT about impact level target of NUHM?

(A)

Reduce IMR by 40%

(B)

Reduce MMR by 80%

(C)

100% institutional delivery

(D)

Achieve TFR of 2.1

**Answer: "Reduce MMR by 80%"**

76.

Under RBSK child screening and early intervention has 4 Ds. Which of the following is NOT part of 4 Ds?

(A)

Defect at birth

(B)

Developmental delay

(C)

Disability

(D)

Deworming

**Answer: "Deworming"**

77.

In which year, Rastriya Kishore Suraksha Karyakram was launched?

(A)

2007

(B)

2012

(C)

2014

(D)

2017

**Answer: "2014"**

78.

Which of the following is part of PHC strengthening action plan under NRHM?

(A)

Adequate and regular supply of essential drugs.

(B)

Provision of 24 hours' service in at least 80% of PHC

(C)

Upgradation of 50% PHCs for 24 hours' referral services.

(D)

Following availability-based treatment.

**Answer: "Adequate and regular supply of essential drugs"**

79.

Mrs. Kalyani lives in urban area of low performing state. She delivered a girl baby in hospital. How much incentive she should receive under Janani Suraksha Yojana?

(A)

Rs. 1400

(B)

Rs. 700

(C)

Rs. 1000

(D)

Rs. 600

**Answer: "Rs. 1000"**

80.

Master Raju a 5year old child is suffering from Severe acute malnutrition. He is admitted for nutritional correction and presently he is in transitional phase of management. Which of the following is NOT a part of transitional phase?

(A)

He has begun to loss oedema

(B)

He is alert and active

(C)

His appetite has improved

(D)

He is on nasogastric feeding.

**Answer: "He is on nasogastric feeding"**

81.

Elements of communication process includes all except

(A)

Communicator

(B)

mike

(C)

message

(D)

Audience

**Answer: "mike"**

82.

Barriers of communication includes all except

(A)

difficulty in hearing

(B)

noise

(C)

age

(D)

emotional disturbances

**Answer: "age"**

83.

What connects the sender to the receiver?

(A)

Channel

(B)

Communication

(C)

Noise

(D)

Feedback

**Answer: "Channel"**

84.

The \_\_\_ in the usage of words may be a severe barrier to effective communication.

(A)

Disturbance

(B)

Discrimination

(C)

Disorder

(D)

Distortion

**Answer: "Distortion"**

85.

Most of us converse using \_\_\_ and \_\_\_ in addition to words when we speak.

(A)

body language and posture

(B)

gestures and body language

(C)

words and gestures

(D)

posture and eye gazing

**Answer: "gestures and body language"**

86.

\_\_\_ refers to pitch, loudness, length, intonation, and tempo.

(A)

Haptics

(B)

Prosody

(C)

Gestures

(D)

Touches

**Answer: "Prosody"**

87.

Which of the following is the main cause for transmission of the Hepatitis virus?

(A)

The bite of a mosquito

(B)

Sharing drug needles

(C)

Drinking contaminated water

(D)

The bite of a bugs

**Answer: "Sharing drug needles"**

88.

A primigravida at 38 weeks of gestation comes to the hospital with complaints of leaking fluid per vaginum. The nurse should assess which of the following to confirm rupture of membranes?

(A)

Fetal heart rate

(B)

Cervical dilation

(C)

Nitrazine test

(D)

Maternal blood pressure

**Answer: "Nitrazine test"**

89.

A pregnant woman is diagnosed with gestational diabetes mellitus. Which of the following is the most appropriate management for this condition?

(A)

Insulin therapy

(B)

Oral hypoglycaemic agents

(C)

Dietary modifications

(D)

Regular exercise

**Answer: "Dietary modifications"**

90.

Which of the following is a potential complication of postpartum haemorrhage?

(A)

Uterine atony

(B)

Oliguria

(C)

Hypertension

(D)

Placental abruption

**Answer: "Uterine atony"**

92.

A newborn is assessed to have a heart rate of 80 beats per minute. What should be the immediate nursing action?

(A)

Administer cardiopulmonary resuscitation (CPR)

(B)

Provide oxygen by mask

(C)

Initiate kangaroo care

(D)

Inform the healthcare provider

**Answer: "Provide oxygen by mask"**

94.

Addition amount of calorie that should be taken by a pregnant woman

- (A)  
300 Kcal
- (B)  
500 Kcal
- (C)  
1000 Kcal
- (D)  
100 Kcal

**Answer: "300 Kcal"**

93.  
Golden colour of amniotic fluid is seen in

- (A)  
Rh incompatibility
- (B)  
Fetal distress
- (C)  
Post maturity
- (D)  
Intrauterine death

**Answer: "Rh incompatibility"**

94.  
Which hormone is helpful in the growth of ovarian follicles?

- (A)  
FSH
- (B)  
LH
- (C)  
Estrogen
- (D)  
Progesterone

**Answer: "FSH"**

95.  
Most common and ideal pelvis is?

- (A)  
Android
- (B)  
Gynecoid
- (C)  
Platypelloid
- (D)  
Anthropoid

**Answer: "Gynecoid"**

96.

The wounded victim is unable to walk, respiratory rate is absent but when airway is repositioned breathing is noted. The wounded victim is assigned what tag colour?

- (A)  
Green
- (B)  
Red
- (C)  
Yellow
- (D)  
Black

**Answer: "Red"**

97.

The wounded victim is unable to walk, respiratory rate is absent and when airway is repositioned breathing is still absent. The wounded victim is assigned what tag colour?

- (A)  
Green
- (B)  
Red
- (C)  
Yellow
- (D)  
Black

**Answer: "Black"**

98.

The wounded victim is able to walk and obey commands. The wounded victim is assigned what tag colour?

(A)

Green

(B)

Red

(C)

Yellow

(D)

Black
